

**DIRECTIONS:**

- FOR HAND WASHING: Dilute 2–4 ounces to each gallon of water in wash bucket. Brush the entire piece of equipment starting at the top and working down to the wheels. Rinse thoroughly and allow to dry.
- FOR AUTOMATIC, COIN OPERATED OR HIGH PRESSURE CLEANING SYSTEMS: Use two to four ounces to one gallon of water. Automatic recycling systems should use one gallon to each five hundred (500) gallons of water in the holding tank. The dilution will give an abundance of suds and will ensure long brush life.

De-Emulsifying Truck Wash is an industrial-strength formulation specifically designed to separate grease and oils from any solution. Use in conjunction with reclaim systems to help separate oils from your wash water.

**DANGER:**

DO NOT TAKE INTERNALLY. HARMFUL IF SWALLOWED.  
CAUTION: KEEP OUT OF REACH OF CHILDREN.  
may cause harm to painted surfaces if not used as directed

**KEEP OUT OF REACH OF CHILDREN.**

**Safety, Storage, Shelf Life:** Always wear proper PPE when handling or working with any chemical. Do NOT apply any chemicals on sun baked surfaces. Product is guaranteed for one year in original container.
